To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:</p> <p>a) <input checked="" type="checkbox"/> The period for reply expires 4 months from the mailing date of the final rejection.</p> <p>b) <input type="checkbox"/> The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.</p> <p>Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).</p>		
<p>Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).</p>		
<p>NOTICE OF APPEAL</p> <p>2. <input type="checkbox"/> The Notice of Appeal was filed on _____. A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a).</p>		
<p>AMENDMENTS</p> <p>3. <input checked="" type="checkbox"/> The proposed amendment(s) filed after a final rejection, but prior to the date of filing a brief, will <u>not</u> be entered because</p> <p>(a) <input checked="" type="checkbox"/> They raise new issues that would require further consideration and/or search (see NOTE below);</p> <p>(b) <input type="checkbox"/> They raise the issue of new matter (see NOTE below);</p> <p>(c) <input type="checkbox"/> They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or</p> <p>(d) <input type="checkbox"/> They present additional claims without canceling a corresponding number of finally rejected claims.</p> <p>NOTE: <u>See Continuation Sheet.</u> (See 37 CFR 1.116 and 41.33(a)).</p>		
<p>4. <input type="checkbox"/> The amendments are not in compliance with 37 CFR 1.121.  MARIANNE PADGETT PRIMARY EXAMINER		

Continuation of 3. NOTE: The limitations of claims 12-13 have been placed in the independent claims, thus creating new issues since the other dependent claims 2-11 & 14-19 were not previously acquired to be considered combined with these limitations.

Continuation of 11. does NOT place the application in condition for allowance because: Claimed a fluidized bed techniques were previously discussed with respect to Quresti et al. (4771523), in view of Facer et al., and require further consideration for their pertinence to the teachings therein as combined with the other dependent claims. Note that Quresti et al. when discussing fluidized bed processes on column 4, lines 60-68, teach that such processes are known in the art and cites USPN 3,616, 983 to Kamimura et al. As employing such processes. While the primary reference has a schematic flow diagram instead of a fully illustrated apparatus structure, Kamimura et al, whose processes are stated to be used, shows apparatus schematics that incorporate the heater 34, which may be inductive heating, as attached to the input of the fluidized bed structure, hence the apparatus/method of Quresti et al. that employs those of Kamimura et al. can be considered to incorporate the inductive heaters in the structure of the fluidized bed basin, since how or where they are incorporated in the fluidized beds/basins' structure is not specified by the claim, so is inclusive of incorporation at inputs or outputs, thus consistent with taught process sequences, i.e. the placement of claims 12-13 directly into the independent claims is not seen to provide patentable significance with respect to teachings of applied prior art, particularly the primary reference.
